

UNIMESSENGER

A Unified solution for all messaging
requirements

Channels of communication on a smart phone

- a) Phone
- b) SMS
- c) Email
- d) IM

Average Time Spent on different channels

- Messages(SMS,MMS,IM) : (5hr, 13min)/day
- Emails : (2hr, 10min)/day

Time we waste on switching applications

- (10-15 min)/ day (in switching)
- (9-13 min)/day (in replying)

Current Problems

- RAM wastage
- Endless stream of notifications --> aggregated feed.
- Current Communication scenario: Fragmented in channels.

Requirement

Communication should be contact oriented and not tech/app oriented.

Solution : Unimessenger

- Contact oriented communication.

- Financial communication:
through our app we can do
financial transactions
seamlessly.

- Lesser background services($1/3^{\text{rd}}$), hence less awake time and more battery life.

- No language barrier :
Google translator to
translate received message
in local language.

Future Prospects

In case there is no internet connection we have planned to Multiple hops Peer to Peer
